LOCAL EXCHANGE SERVICES TARIFF

TARIFF FORMAT

Page Numbering - Page numbers appear in the upper right corner of the sheet. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between existing pages with whole numbers, a decimal is added. For example, a new page added between pages 34 and 35 would be page 34.1.

Page Revision Numbering - Revision numbers also appear in the upper right corner of the page. These numbers are used to determine the most current page version on file with the Commission. For example, Fourthth Revised Page 34 cancels the Third Revised Page 34. Consult the check sheet for the page currently in effect.

Check Sheet - When a tariff is filed with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the tariff pages, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made. The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

Explanation of Symbols - When changes are made in any tariff page, a revised page will be issued canceling the tariff page affected. Changes will be identified on the revised page(s) through the use of the following symbols:

- (R) to signify a reduction.
- (I) to signify an increase.
- (C) to signify a changed regulation.
- (T) to signify a change in text but no change in rate or regulation.
- (S) to signify a reissued matter.
- (M) to signify text relocated without change.
- (N) to signify a new rate or regulation.
- (D) to signify a discontinued rate or regulation.
- (Z) to signify a correction.

In addition to symbols for changes, each changed provision in the tariff shall contain a vertical line in the right hand margin of the page which clearly shows the exact number of lines being changed.

Transfer of Calls Service is a service used when a Customer disconnects service or changes their telephone number. Calls to the intercepted telephone number are referred to a recorded message if requested by the Customer. The announcement states that the called number has been disconnected or changed. If the number is available, it is given to the caller. Customers must contact the manufacturer or distributor of their telephone set if they have any questions.

Call Forwarding shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of message toll charges that would regularly be applicable between the access line originating the call and the access line to which the call is transferred. Customers utilizing Call Forwarding service are responsible for the payment of charges for each toll call between the customer's access line and the distant access line to which the call was transferred.

3.3 Custom Features (Continued)

3.3.3 <u>Call Forwarding</u> (Continued)

Call Forwarding - (Selective) - Selective Call Forwarding provides the Customer with the ability to forward incoming calls from pre-selected telephone numbers to another telephone number. The Customer can construct or modify a telephone number screening list. Incoming calls will be screened against the Customer's list and only those telephone calls from telephone numbers on the list will be forwarded. The Selective Call Forwarding Customer is responsible for the payment of charges (i.e., toll charges) for each call between the Selective Call Forwarding equipped telephone line and the line to which the call is being forwarded. Calls from numbers not on the list will receive standard call completion. The Customer must also subscribe to the Call Forwarding feature.

Subscribers to Selective Call Forwarding activate the service and construct or modify the screening list by dialing *63 and following the prompts. This service may be temporarily deactivated by dialing *83.

d. <u>Call Forwarding - Busy Line/No Answer</u> - Call Forwarding - Busy Line/No Answer provides the features of Call Forwarding - Busy Line as described above as well as the features of Call Forwarding - No Answer as described above. The Customer is responsible for the payment of charges (i.e., toll charges) for each call between his/her call forwarding equipped telephone line and the line to which the call is being forwarded. The transmission may not meet normal standards depending upon the distance and routing necessary.

3.3 Custom Features (Continued)

3.3.4 Call Return - (*69) - This feature allows the Customer to automatically return the most recent incoming call, even if it is not answered. If the telephone number is busy, Call Return will attempt to call the number for a maximum of thirty (30) minutes after the feature is activated. Once the call is established, the Customer will hear a special ring when the call can be completed. This is accomplished by the Customer activating a code. NOTE: Some telephones are only capable of providing a standard ring. Customers must contact the manufacturer or distributor of their telephone set if they have any questions. The operability of this call back feature is dependent upon whether the caller's originating telephone number can be recognized, or not.

This feature (usage sensitive) is available on a pay per use basis and the functionality is the same. This feature (usage sensitive) will be provisioned with local service unless customer requests the feature to be blocked or it is included in a package.

3.3.5 <u>Call Trace - (Customer Originated)</u> - Allows a customer to request an automatic trace of the last incoming call. This provides an easy way to trace obscene, threatening or harassing calls. A Call Trace may be activated at any time during or immediately following the call to be traced. The incoming call detail recorded by the Company showing the results of the trace (i.e., telephone number traced) will not be released to the customer. Such call detail shall be provided only to law enforcement authorities upon request. A trace cannot be successfully completed if the incoming call originates in a telephone central office not equipped for Call Trace Service.

At its option or upon receipt of a proper request from a law enforcement agency, the Company will set up a temporary tracing arrangement using Call Tracing at no charge to the customer when in the judgment of the Company or law enforcement agency, the unwanted call(s) present a serious threat of harm or destruction of property.

3.3 Custom Features (Continued)

- 3.3.6. <u>Call Waiting</u> This feature provides a tone signal that alerts the Customer talking on the line when a second call is incoming. A maximum of two calls may be in process at one time. A Customer who subscribes to Call Waiting can also inhibit the reception of the Call Waiting tone for the duration of a single call, preventing interruption of the call by activating the code (*70) to cancel Call Waiting. This functionality is automatically included with the Call Waiting feature at no additional cost to the Customer.
- 3.3.7 <u>Call Waiting ID (With Name and Number)</u> Call Waiting ID with Name and Number is an enhanced version of Call Waiting ID. This feature is designed for use by customers who are subscribed to Call Waiting and Caller ID. A customer who is off-hook on an existing call, is able to receive the telephone number of a new incoming call on their customer-provided premise equipment attached to the Customer's subscriber line. Additionally, the name found in the Company's records, applicable to the line originating the call, including the non-published and non-listed service is displayed on customer-provided premise equipment. The Customer must purchase the equipment separately, and it is not available under this tariff.
- 3.3.8 Speed Dial 8 This feature allows the Customer to reach a list of frequently called numbers by dialing an abbreviated code. The Customer may call up to eight preselected numbers by dialing one-digit codes. Programming of these numbers is completed by the Customer.
- 3.3.9 <u>Three-Way Calling</u> Enables a customer to add a third party on an existing call without operator assistance, thereby establishing a three-way conversation. The transmission quality may vary depending on the distance and routing necessary and may not necessarily meet normal standards.

Three-Way Calling (usage sensitive) is available on a pay per use basis and the functionality is the same as Three-Way Calling. Three-Way Calling (usage sensitive) will be provisioned with local service unless customer requests the feature to be blocked or it is included in a package.

 - 3.3.12 <u>Caller ID Name and Number Blocking Per Line -(*67)</u> Any Company calling party may prevent the delivery of Calling Party Number and Calling Party Name to the called party by dialing an access code (*67 on their touch-tone pad or 1367 from a rotary telephone) immediately prior to placing a call. The access code will activate blocking on a per call basis.
 - 3.3.13 Priority Call Service (*61) This feature permits the Customer to preselect telephone numbers that can be given a distinctive alerting signal or ring. The Customer can create or change a list of telephone numbers by dialing an activation code. NOTE: Some telephones are only capable of providing a standard ring. Customers must contact the manufacturer or distributor of their telephone set if they have any questions.
 - 3.3.14 Selective Call Rejection Selective Call Rejection enables the Customer to block calls from up to fifteen (15) pre-selected telephone numbers. To block specified telephone numbers, the Customer builds a screening list via code activation. Customers may access their screening list to add telephone numbers by dialing *60. Customers may deactivate Selective Call Rejection by dialing *80. To block an unknown telephone number after receiving the call, the Customer enters a blocking code to add the number to the Customer's screening list. In the event that facilities are unavailable to provide incoming call screening from the Customer's list, standard call completion will occur. Customers whose telephone numbers are blocked are directed to a prerecorded announcement regarding the block.

SECTION 6 - LOCAL MARKET TRIALS

- 6.1 Purpose A market trial is intended to enable the Company to test its ability to provide services that may eventually be made available to the general public. As a part of a market trial, the Company may need to test the capabilities of the systems required by a proposed service, including, but not limited to, systems needed to establish, provision, operate, bill and/or collect for a service, whether such systems are provided solely by the company or in combination with systems provided by other carriers or vendors. A market trial is not an offer to provide service to the general public.
- **Eligibility** The Company may limit customers who are eligible to receive a service that is offered as part of a market trial, including but not limited to, limitations on the number of customers or the classes of customers who may subscribe to the service during the market trial. Additionally, the Company may limit the market trial to customers who are employees of the Company.
- 6.3 Availability The Company, at its option, may choose to offer a market trial service on a statewide basis or may limit the availability of a market trial service to a smaller geographic area. The area in which a market trial service is available may include all or part of an exchange and need not conform to existing exchange area boundaries.
- **Duration** A market trial may be conducted for any period of time defined by the Company, not to exceed 12 months.
- **Notice** The Company will notify the Commission in writing of any local market trial services being offered in Arizona.
- 6.6 Applicability of Other Tariff Provisions If the terms and conditions of the market trial conflict with other provisions of this tariff, the market trial terms and conditions shall govern the market trial service offering. In all other instances, a market trial shall be subject to the other terms and conditions for service as contained in this tariff.
